

Accessible Color Guide

When using our color palette, color contrast should reach a minimum of WCAG level AA.

Avoid using only color to emphasize elements. For example, avoid using only color to indicate error states or different states of a link (text link, focus or hover state).

AA18 indicates that for this color combination, text must be 14 point (typically 18.66px) and bold or larger, or 18 point (typically 24px) or larger.
